Look What We Learned

5TH GRADE MATH & SCIENCE

This quarter fifth grade worked with place value with addition, subtraction, and decimals. We are now busy working on multiplication. In science, we learned all about the microscope and investigating matter. We found out about solutions and mixtures in lab!

6TH GRADE MATH & SCIENCE

Sixth grade focused on addition and subtraction operations and expressions as well as factors and multiples. We are now focusing on multiplication operations and expressions. In science, we learned about microscopes and the Sun, Moon, and Earth system. We did a mystery microscope lab too!

7/8 MATH & SCIENCE

In Math, seventh and eighth grade worked with operations with integers and rational numbers. In Science, they learned about microscopes and matter and energy in ecosystems. For Halloween, we did a pH of candy lab. Ask us to tell you more about it!
