

FIRST QUARTER PRESCHOOL 4

We have been so busy in Pre 4 the past few months have just flown by! Students spent the first few weeks of school learning how to spell and write their names. So many children can now write their names without any help!

In the beginning of October we began our letter of the week. The children have been working very hard learning how to recognize and write each letter, the sound each letter makes, and thinking of words that begin with that letter. Our show and tell letter bags have been so much fun!!

We will not have a letter of the week during the month of December, we will pick back up with that when we come back from Christmas break. When we come back, we will also begin learning one number a week. We will learn to recognize each number and write it.

Our field trip to Fletcher Farm was so much fun!! The children had a great time. They went on a hayride, picked out their own pumpkins, and got to visit with the baby cows!!

Speaking of cows..our classroom adopted a cow again this year!! It is a real cow that lives on a dairy farm in Vermont. Through this program children will learn many different things about dairy farms and cows! Every few months we will receive picture and video updates on our cow, which we will view and discuss together throughout the school year. This is a fun educational program for the children! There will be many activities that we will be doing that go along with each cow update!
