Look What We Learned

5TH GRADE MATH & SCIENCE

This quarter fifth grade worked with multiplication. We are now busy learning about long division. In science, we learned about ecosystems and interactions among living things. We also did a STEM project where we designed and built gingerbread houses.

6TH GRADE MATH & SCIENCE

Sixth grade focused on multiplication and division in math. We are now busy learning about numerical and algebraic expressions. In science, we learned all about our solar system and the periodic table. We also did a STEM project where we designed and built gingerbread houses.

7/8 MATH & SCIENCE

In Math, seventh and eighth grade worked with scientific notation and algebraic expressions. In Science, they learned about dynamic ecosystems. They also did a STEM project where they designed and built gingerbread houses.
